

# Diligence Checklist

## QUESTIONS TO ASK A CTA TRAINING PROGRAM:

### TEACHING QUALITY

1. Do I get to manipulate all the cases myself or am I **only watching** a recording or watching someone else manipulating the images for **any** of my supposedly mentored cases?
2. Who is actually teaching the course? Is it the luminary whose name is on the course teaching the entire course? Is it a **fellow** or other less experienced teacher? Is it a **dedicated lecturer** or just one that is rotating through? Did the instructor pick the cases and write the curriculum? Are they really the expert in the subject matter?
3. Is there a dedicated Level 3 teacher/lecturer present during the **entire** course, or are students ever left to work **unattended**?
4. How many students has the instructor trained on that specific brand of workstation? For how long? How many courses have they run in total?
5. Is your program certified by the SCCT? Do you have testimonials on [www.SCCT.org](http://www.SCCT.org)?

### WORKSTATIONS

6. Do I have to **share a workstation** with another student?
7. Do you own your workstations or are they **borrowed from a vendor**? Do you have full time **tech support** onsite or do you rely on the vendor to provide uncompensated support?

*Please do your research before investing in CTA training. Numerous students have been left undertrained by popular training programs. Your proficiency depends on the quality of your training!*
