

5 QUESTIONS YOU SHOULD ASK A CTA TRAINING PROGRAM

- Do I get to manipulate all the cases myself or am I **only watching** a recording of someone else manipulating the images for all 150 cases?
- Do I have to share a workstation with another student?
- Is there a dedicated Level 3 teacher lecturer present during the entire course or are students ever left to work **unattended**?
- How many students has that instructor trained on that specific brand of workstation? For how long?
- For Level 1 classes: Do I get my live case requirement or do I need to **return** for more training?
